Healthcare Enforcement Network (HEN) — Complete Research Documentation

Document Date: January 2, 2026

Website: <http://localhost:3001> (<http://localhost:3001>)

Total Entities: 54

Total Connections: 31

Total Sources: 15

PART I: METHODOLOGY

A. Data Collection Process

Step 1: Primary Source Identification

Source	Type	Records Retrieved	Date
DOJ Press Releases	Federal Enforcement	15+ cases	2026-01-02
HHS-OIG LEIE Database	Exclusion Records	82,389 total	2026-01-02
Court Filings (PACER)	Indictments/Sentencings	8 cases	2026-01-02
California DOJ	State Enforcement	1 case	2026-01-02

Step 2: Entity Extraction

For each enforcement action identified:

1. Extract organization names from DOJ press releases
2. Extract individual defendants from indictment headers
3. Record enforcement type, date, jurisdiction, and fraud amount
4. Identify principals (owners, CEOs, officers, directors)

Step 3: Connection Discovery

Connections were identified through:

1. **Same Case Analysis:** Entities named in same prosecution
2. **Principal Matching:** Same individual across multiple entities
3. **Ownership Records:** DOJ or court documents showing ownership
4. **Address Verification:** LEIE database address matching
5. **Family Relationship:** DOJ documents identifying family ties

Step 4: Two-Type Validation

Every connection required validation by **at least two independent criteria**:

- If only one criterion exists → Connection REJECTED
 - If two or more criteria exist → Connection ACCEPTED with validation notes
-

B. Connection Criteria Definitions

Criterion	Definition	Evidence Required
Shared Principal	Same individual serves as officer/director/manager	DOJ document or SOS filing
Shared Ownership	Same individual/entity holds ownership stake	DOJ conviction or court filing
Same Case	Named in same legal proceeding	DOJ press release or indictment
Co-Defendant	Criminal co-defendants in prosecution	Court docket
Shared Address	Same physical business/mailing address	LEIE database or SOS filing
Family Relationship	Blood or marriage relationship	DOJ document
Straw Ownership	Nominee owner concealing true owner	DOJ allegation or court finding
Patient Transfer	Documented movement of patients	Court evidence
Documented Transaction	Contract, payment, or business dealing	Court documents

C. Disallowed Connection Criteria

The following are NOT sufficient to establish connections:

Criterion	Why Disallowed
Shared Registered Agent alone	Common commercial service (CT Corp, CSC)
Industry proximity	Same healthcare sector is not meaningful
Geographic proximity alone	Same city/county without other nexus
Temporal proximity	Enforcement at similar time ≠ connection

D. Limitations

D.1 Data Limitations

- **Time period focus:** 2020-2026 enforcement actions
- **Federal emphasis:** DOJ enforcement prioritized; state actions may be underrepresented
- **Pending cases:** Limited public information on ongoing investigations
- **Sealed records:** Cannot access sealed court documents

D.2 Connection Limitations

- Only publicly documented connections included
- Private ownership structures may not be visible
- Shell company chains limited to public filings
